\* The annual percentage yield is based on an assumption that dividends will remain in the account until maturity. A withdrawal will reduce earnings.

## Share Certificates

**Crediting Frequency** - Dividends will be credited to your account every month. If you choose to have your dividends mailed to you in check form the dividends must be \$25.00 or greater. If dividends are below \$25.00, they will be deposited into your account.

**Transaction Limitations** - After the account is opened, you may not make additions into the account until the maturity date stated on the account. You may make withdrawals of principal from your account before maturity. Principal withdrawn before maturity is included in the amount subject to early withdrawal penalty. You can only withdraw dividends credited in the term before maturity of that term without penalty. You can withdraw dividends anytime during the term of crediting after they are credited to your account. This dividend withdrawal limitation does not apply if you have made arrangements to have dividends paid to you or to another account in lieu of having them credited to this account.

**Automatically Renewable Account** - This account will automatically renew at maturity. You may prevent renewal if you give notice before maturity of your intention not to renew, or you withdraw the funds in the account at maturity (or within the grace period mentioned below, if any). We can prevent renewal if we mail notice to you at least 30 calendar days before maturity. If either you or we prevent renewal, dividends will not accrue after final maturity. Each renewal term will be the same as the original term, beginning on the maturity date. The dividend rate will be the same we offer on new term share accounts on the maturity date which have the same term, minimum balance (if any), and other features as the original term share account. You will have a grace period of 10 calendar days after maturity to withdraw the funds without being charged an early withdrawal penalty.
